

Hocking Phishing Awareness Campaign (HPAP)

Network Systems Security Capstone - NET-2650
May 5, 2026

Created by Network Systems Security Class of 2026

Purpose

Increase phishing awareness across campus

Reduce successful phishing attacks

Teach users how to recognize and respond

Build long-term cybersecurity habits

Why This Matters

One Click Can
Impact the Entire
College

Phishing can lead to:

- Data Exposure
- Financial Fraud
- Institutional damage
- Account Compromise

Common Phishing Methods

EMAIL PHISHING (IT,
FINANCIAL AID,
PROFESSORS)

SMISHING (TEXT
MESSAGES)

QR PHISHING

CREDENTIAL
HARVESTING (FAKE
LOGIN PAGES)

Human Factors

Why Phishing Works

- Urgency
- Authority
- Curiosity
- Fear

Our Solution: HPAP

Hocking Phishing Awareness Program:

- Campus wide
- Repeatable
- Simple

THE 3 PILLARS

Our Approach:

Training

Awareness

Detection

The Photo by Photo Author is licensed under CC BY SA.

A complete approach to reducing phishing risk across campus

Training Users

Integrated into Pathways to Prosperity:

- Real-world examples
- How to spot phishing
- End-of-module test

Training Structure

Short, focused training modules

Real phishing examples in each section

Interactive quiz at the end of module

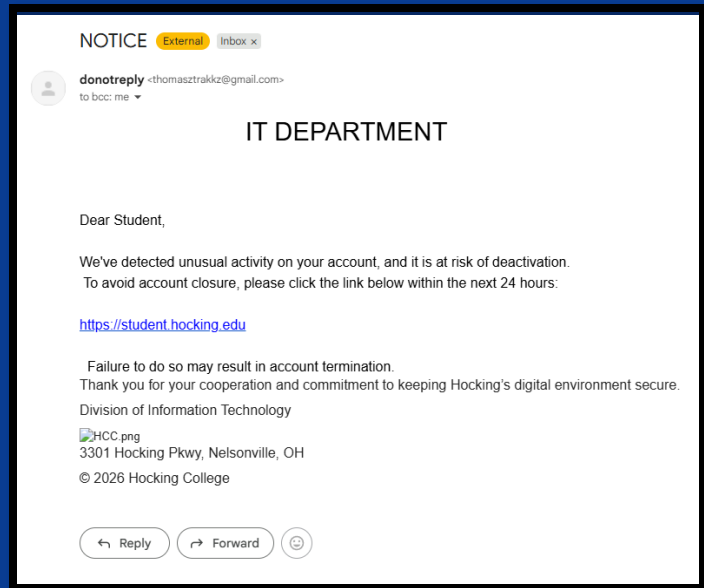

Immediate feedback on answers

Reinforces “Pause, Verify, Report”

Real-World Scenarios

BLACKBOARD
ALERTS

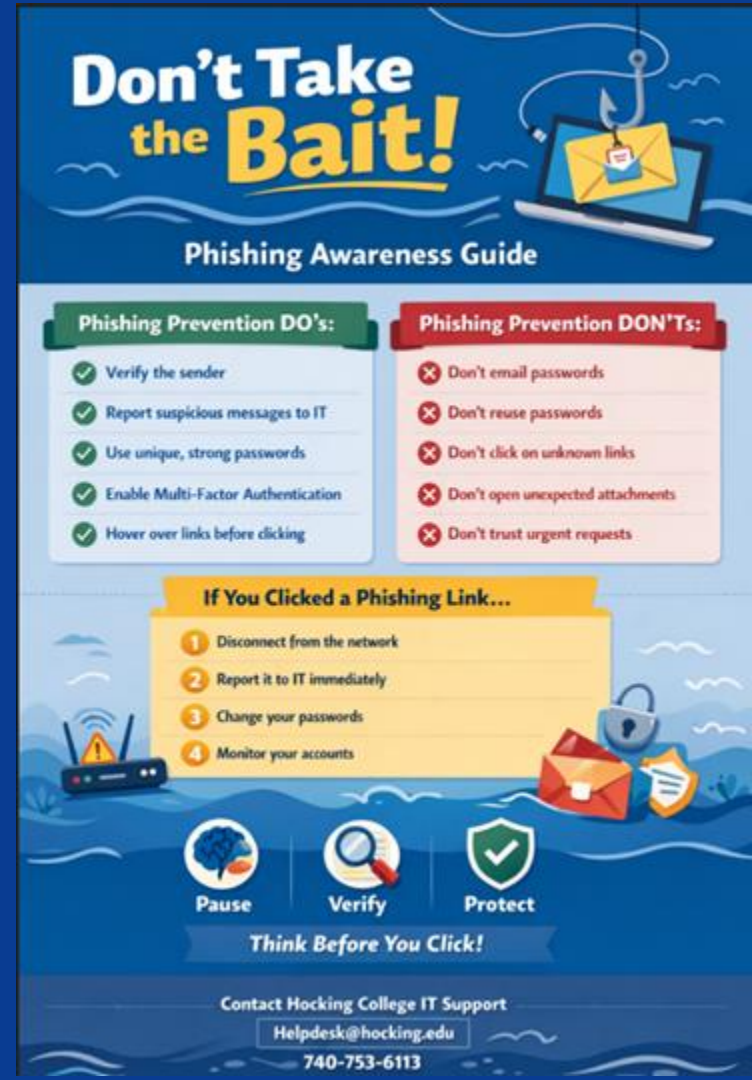

FINANCIAL AID
MESSAGES

ACCOUNT
SECURITY
WARNINGS

Reinforcing Awareness

- Posters across campus
- Flyers & trifolds at events
- Email tips and reminders
- Repetition builds habits
- Student ran

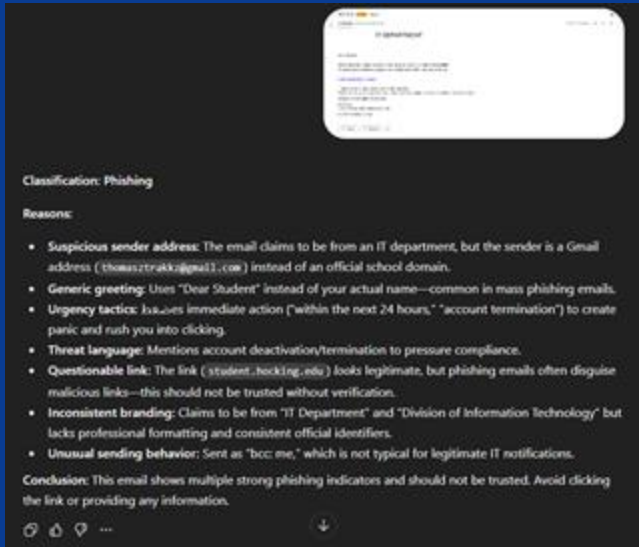

PhishGuard AI:

- Instant phishing check
- Simple user guidance
- Supports decision-making

This gives users immediate support instead of guessing.

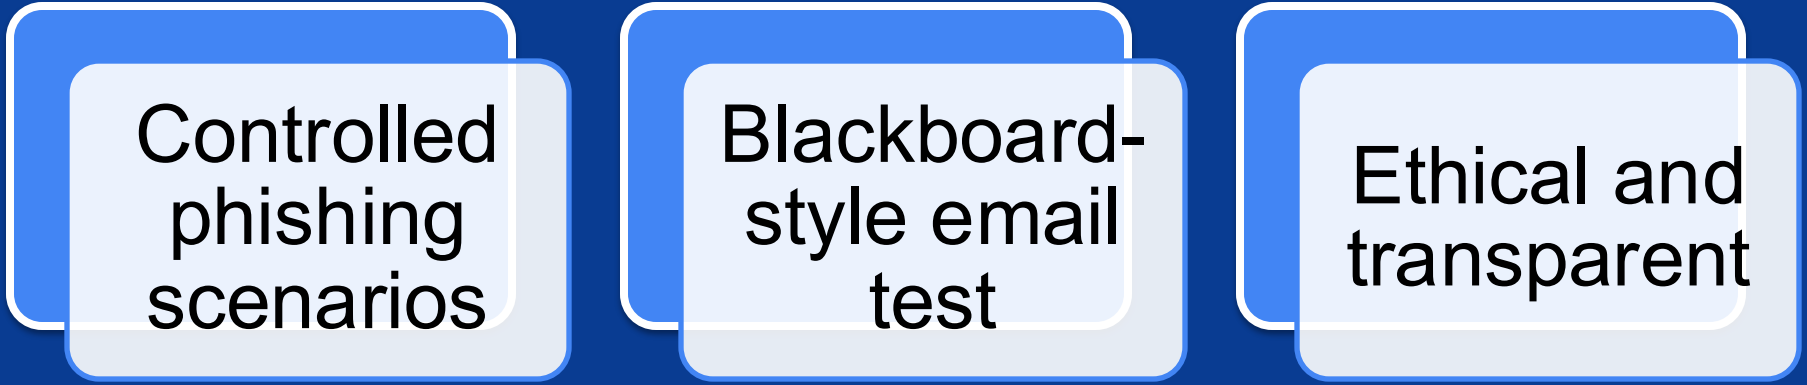

Reporting Suspicious Messages

1. Do NOT click
2. Verify the sender
3. Report to IT
4. Delete the message

Phishing Simulation

Controlled
phishing
scenarios

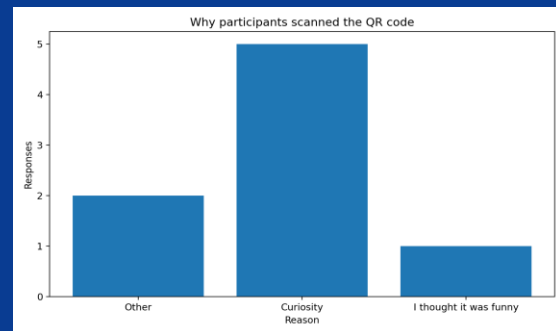

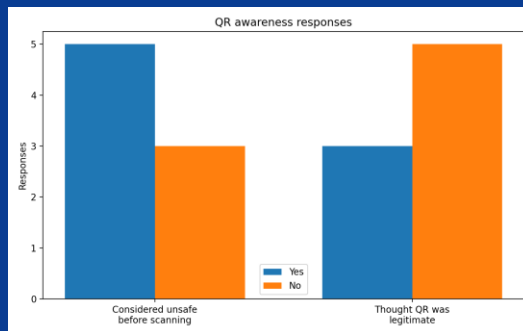

Blackboard-
style email
test

Ethical and
transparent

QR Code Test:

Test QR codes placed around campus

- Measures:
 - How many users scan them
 - User behavior
 - User Awareness
- Simulates real phishing tactics

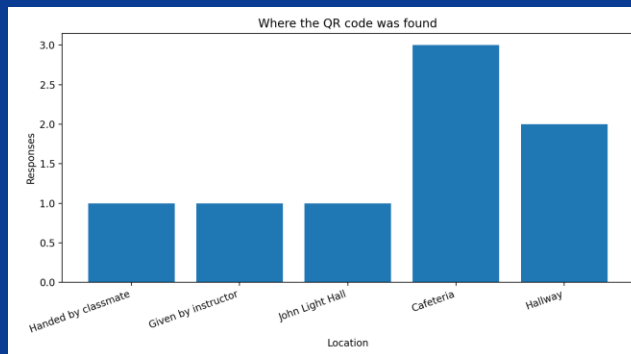

QR Codes will:

Redirect to an awareness page

No personal data will be collected

Used only for educational purposes

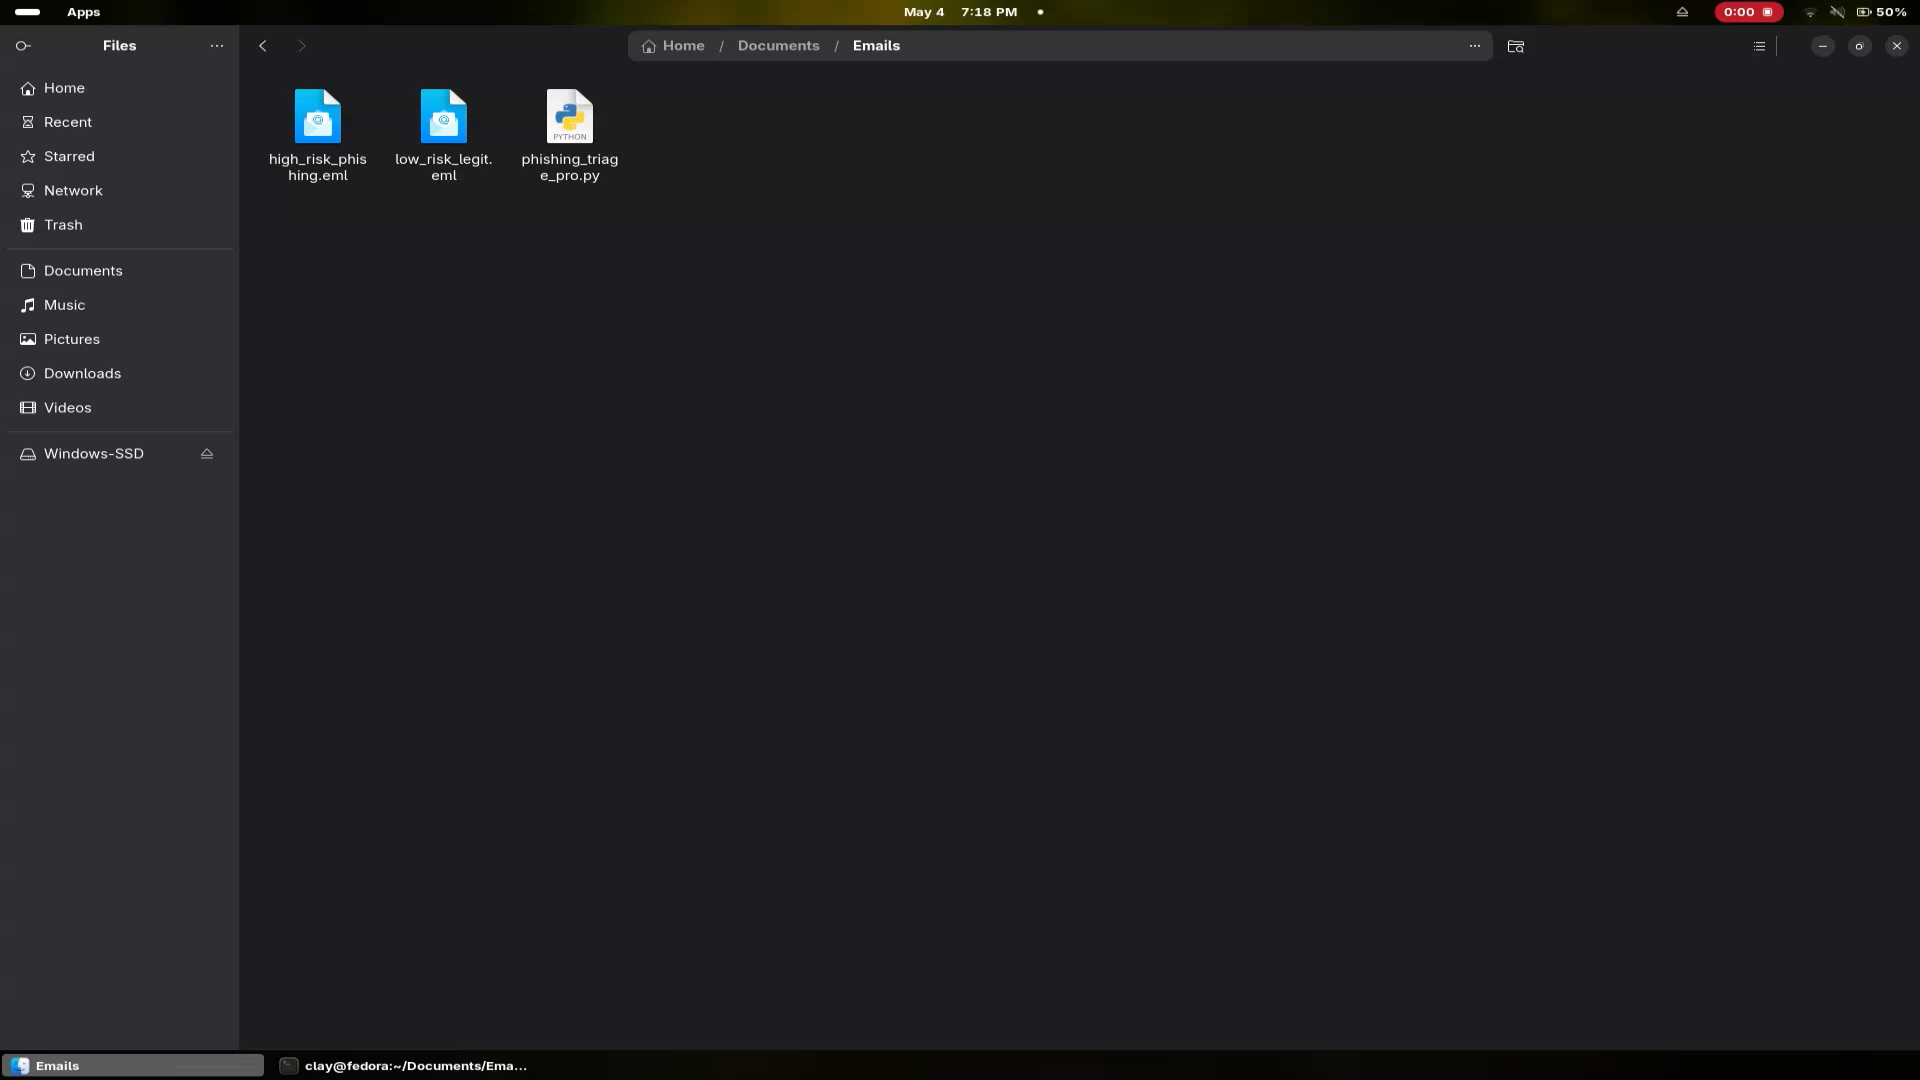

Phishing Detection Tool

- Analyzes reported emails
- Detects:
 - suspicious keywords
 - spoofed domains
 - malicious links
- Outputs risk score
- Helps IT identify high-risk phishing threats faster

```
~/Downloads > python phishing_triage_pro.py
1. Analyze .eml file
2. View dashboard
Choose option: 1
Enter .eml file path: high_risk_phishing.eml

=== ANALYSIS RESULT ===
Subject: Blackboard Access Alert
Sender: blackboard-support@hocking-blackboard-login.com
Risk Level: HIGH
Score: 11

Findings:
- Keywords: ['verify', 'account', 'immediately']
- Untrusted domain: hocking-blackboard-login.com
- Spoofed domain: hocking-blackboard-login.com
- Reply-To mismatch
```
